*Includes where precise Auckland district is unknown

S. Typhimurium
Others

62
51

B Blood culture isolate, includes two isolates *S. Enteritidis* phage type 26 TK, one of which was also isolated from cerebrospinal fluid.

C Uncommon serotype or phage type

H Household cluster, includes one isolate *S. Typhimurium* phage type 1 CB contact of a case reported in April, two isolates *S. Typhimurium* phage type RDNC CB, and one isolate *S. Typhimurium* phage type 156 contact of cases reported in March and April

U Urine isolate

t M/20 CA phage type E1a. Recent travel Cambodia.

F/30 WK phage type E1a. Travel history unknown.
