

This report summarises confirmed measles notifications for the previous surveillance week (Week 6: 1–7 February 2020) and cumulative cases since 1 January 2019. The case classification used in this report can be found on the [Ministry of Health website](#).

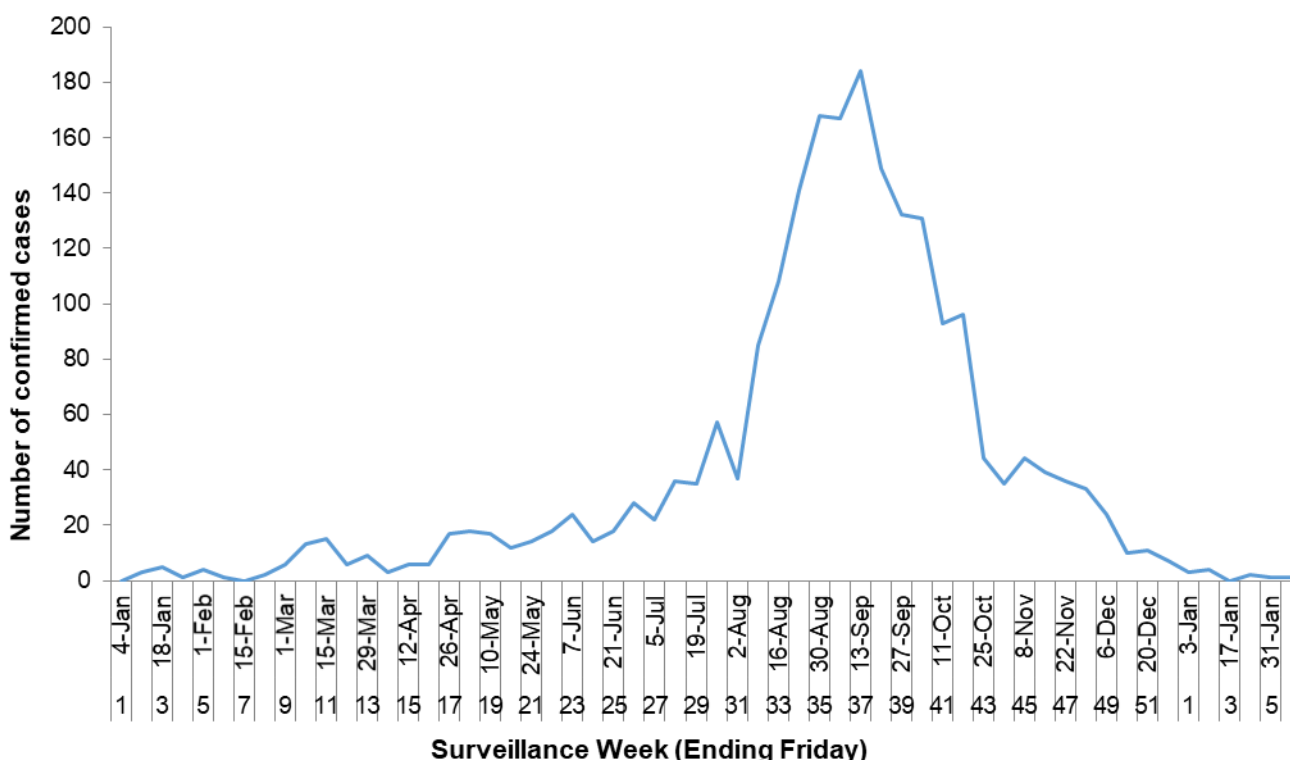

Information is based on data recorded on EpiSurv by public health service staff as at 0830, 10 February 2020. Changes made to EpiSurv data after this time will not be reflected in this report. The results presented may be updated and should be regarded as provisional.

From 10 February 2020, this report will show numbers of confirmed cases and hospitalisations by DHB only.

## Summary

There was one confirmed measles case reported for Week 6/2020, bringing the total to 2195 since 1 January 2019, with 774 (35.3 %) hospitalisations. There are two ongoing outbreaks.
