

Erratum: In the September 2006 issue of the NZPHSR, four of the disease rates in the table on page three (Pertussis, Tuberculosis, Malaria and Leprosy) were incorrectly reproduced, indicating rates 10 times lower than the correct rates. Below is the corrected table for these diseases. The rates in the text accompanying the table in Section 2 are correct.

National Surveillance Data

12-Monthly Notification Rate Changes ⁽¹⁾

Rate Change Symbol Key:

- Rate increase from the previous 12 month period
- Rate decrease from the previous 12 month period
- Statistically significant rate change
- Statistically non-significant rate change

⁽¹⁾ Rates are calculated for the 12-month period to the end of June 2006.
