

Sexual health clinic (SHC) surveillance of STIs: October-December 2015

Quarterly case counts in participating SHCs by disease, January 2014 to December 2015

No cases of chancroid, granuloma inguinale or lymphogranuloma venereum were reported during the last quarter

Note: Data was not received from the Ashburton SHC for January 2014 and 2015. This clinic sees only a small number of STI cases each month. Quarter 4 numbers are slightly lower than usual as Gisborne SHC had a change in computer systems during this quarter.
