In the past week, a total of 292 consultations for influenza-like illness were reported from 75 general practices in 23 of the 24 health districts. This gives a weekly consultation rate of 93.3 per 100 000 patient population.

Figure 1 compares the consultation rates for influenza-like illness for each health district over the past week. Northland had the highest consultation rate (583.1 per 100 000), followed by Wanganui (539.5 per 100 000).

Forty-two swabs were sent from the sentinel surveillance in the past week. Forty-seven were received by virology laboratories. Of these, 20 influenza viruses were identified, nine A H3N2 (not antigenically sub-typed), seven B (not antigenically typed), and four influenza A (yet to be sub-typed). The distribution by health district is shown in Table 1.

In addition, 54 influenza viruses were reported this week from the laboratory-based (non-sentinel) surveillance, 29 influenza A (yet to be sub-typed) and 25 B (not antigenically typed). The distribution by health district is shown in Table 2.

Figure 2 show the cumulative total of influenza viruses confirmed (sentinel and laboratory-based surveillance) to the end of week 29, 18 July 2008. A total of 312 influenza viruses were identified, 143 influenza A (yet to be sub-typed), 53 A/Brisbane/10/2007 (H3N2) – like, 31 A H3N2 (not antigenically sub-typed), one A H1N1 (not antigenically sub-typed), 68 influenza B (not antigenically typed), and 16 B/Florida/4/2006 – lineage.

**Figure 2: Cumulative laboratory-confirmed isolates by health district to 18 July 2008**

Figure 3 shows the weekly national consultation rates for 2006 and 2007 seasons, and 2008 so far. The current rate of influenza is higher than at the same time last year.
Figure 3: Weekly consultation rates for influenza-like illness in New Zealand, 2006, 2007 and 2008

Figure 4 illustrates consultation rates for influenza-like illness mapped by health district for week 29, 2008.
Consultations for Influenza-like Illness (per 100,000 practice patients)

- No Data
- No Activity (0)
- Baseline (<50)
- Normal (50 - 249)
- High Activity (250 - 399)
- Epidemic (>=400)
